

TOTAL RELEASE SANITIZER FOGGER

Imagine how long it would take to fully disinfect every single surface in a room, or in a vehicle?

With B SANITIZED, you can do this in just minutes!

Great for – hotels rooms, homes, restaurants, toilets/bathrooms, classrooms, day care and care homes, ambulances, hospitals, school buses, public transport, taxis, cars, trains, planes, boats, motorhomes, kennels, offices, meeting rooms, in fact anywhere where people come together in enclosed areas and anywhere germs exist!

KILLS BACTERIA AND VIRUSES

LONGER LASTING PROTECTION

ELIMINATES ODOURS FROM AIR

Don't waste time and money on unnecessary work.

B SANITIZED is a registered disinfectant sanitizer made to BS EN 1276, BS EN 1650 and BS EN 14476 standards in a full release aerosol fogger of a broad-spectrum EPA-registered antimicrobial agent for all surfaces. B SANITIZED also contains a patented odour counteractant for effective and immediate odour control!

B SANITIZED is effective against HIV, TB, Herpes Simplex II, Influenza viruses, human coronavirus, Staphylococcus aureus, Salmonella enterica, and Athletes foot fungi. It controls mould and mildew by destroying them at their source!

When placed in the centre of a room B SANITIZED will effectively disinfect all surfaces, cover all areas that are difficult to access like headboards, window coverings, door handles, ceilings, flooring, and under beds allowing the entire area to be fully disinfected and germ-free. Alternatively, B SANITIZED can also be used as an aerosol spray directly on surfaces.

The units are available in 2 sizes, 5 oz. (150ML) and 6.6 Oz. (200ML) – they cover areas of 4000 cu ft (20 by 20 ft) or 6000 + cu ft (around 25 by 25 ft). For larger areas, use additional cans using the measurements above to get the area covered.

B SANITIZED is also ideal for disinfecting vehicles, including their air conditioning systems. For vehicles like buses, cars, RVs and boats, place the can in the centre of the vehicle, press the spray button to lock and leave. Return in 15 minutes and aerate as needed and the vehicle will be totally disinfected. Keep the vehicle running with the A/C on full operation in recycle mode, and the fog will disinfect the entire AC system, too! Simple. No fuss.

It's so simple! Again, just place the can in the middle of the room or area to be fogged.

Press the spray button lock into place and leave the room/area.

Return in 15 minutes, after the mist has settled, aerate the area as needed and it is now fully disinfected, fresh and ready to use. No expensive labour, no fuss. Just simple.

It is safe for food preparation areas too (not to be sprayed directly onto food).

NEW
**HAND
SANITIZER
IN A CAN**

B CLEAN – our new hand and multi surface sanitiser in a can. Effective hand sanitizer with virucide and alcohol to keep your hands and multi surfaces free from germs. Use on keyboards, phones, and other surfaces that are difficult to keep clean. Ideal for home, cars, offices and much more. The spray can atomizes effectively, is economical to use and is ideal even for those hard to get to areas.
